BENDIX SYSTEMS DIVISION ANN ARBOR, MICH. NO.

Magnetometer Programming for  
DPS 2000 (System Test Set)

ATM 580

REV. NO.

PAGE 1 OF 2 PAGES

This ATM is a statement of the magnetometer processing currently included in the DPS 2000 computer programs being written for the ALSEP System Test Set. There is one magnetometer program used two ways:

1. Process magnetometer data with no other experiments operating.
2. Process magnetometer data with other experiments operating. (This would include systems integration, cross talk, integrated systems test.)

The magnetometer programs operate under control of the real time executive program; the purpose of which is to permit experiment data decommutation, control processing and input/output. The executive also decommutates the main frame sync pattern, housekeeping count, mode ID, and additionally processes word 33 (Central Station Housekeeping) and word 46 (command verification).

Executive processing of words 33 and 46 is as follows:

1. Word 33 (for data not explicitly related to LSM in the executive):
  - A. May be continuously printed under sense switch control.
  - B. When the housekeeping subcom is in lock, (after two complete 90 word passes), automatic printing will occur when either out of spec, or changed from the most recent previous values.
  - C. Whenever a command has been received at word 46, the next immediate 90 housekeeping words will be printed.
2. Word 46: Whenever not equal to zero, it is printed. With unsuccessful parity, a "p" is printed along side the command. A comparison is made between the command transmitted and the command received in word 46.

There is provision for sending uplink commands by manual insertion.

The magnetometer program decommutates its own data, organizes it, processes it and prepares it for output. There is provision (using sense switches) for enabling or inhibiting data output.

The following main frame words (arranged in the order received) are of interest to the magnetometer programs:

Word 2 - main frame housekeeping identification

Word 5 - magnetometer housekeeping data

- Bit 9 - sync bit
- Bits 2-8 - housekeeping value
- Bits 0-1 - flag bits

Words 17, 19, 21 - magnetometer scientific data

- Bit 9 - sign bit (1=+, 0=-)
- Bits 0-8 - magnitude

11/29/66

Word 33 - Main frame housekeeping

Word 46 - command verification

Words 49, 51, 21 - magnetometer scientific data

Bit 9 - sign bit (1=+, 0=-)

Bits 0-8 magnitude

This data is processed into the following format:

M	CC	FF	HHH	NN	± XXX	± YYY	± ZZZ
	VVV	RRR			± XXX	± YYY	± ZZZ

M - Magnetometer ID

C - Magnetometer Housekeeping Count

F - Flag Bits

H - Magnetometer Housekeeping (printed only when out of range)

N - Main frame count

X, Y, Z - Magnetometer Data

V - Command verification

R - Central Station Housekeeping

The accompanying functional flow chart is intended only to provide interested parties with an outline of program flow. As program debugging progresses, detailed flow charts just above the coding level will be drawn. These charts and annotated assembly listings will be appended to this document when they are available.

DATA FORMAT

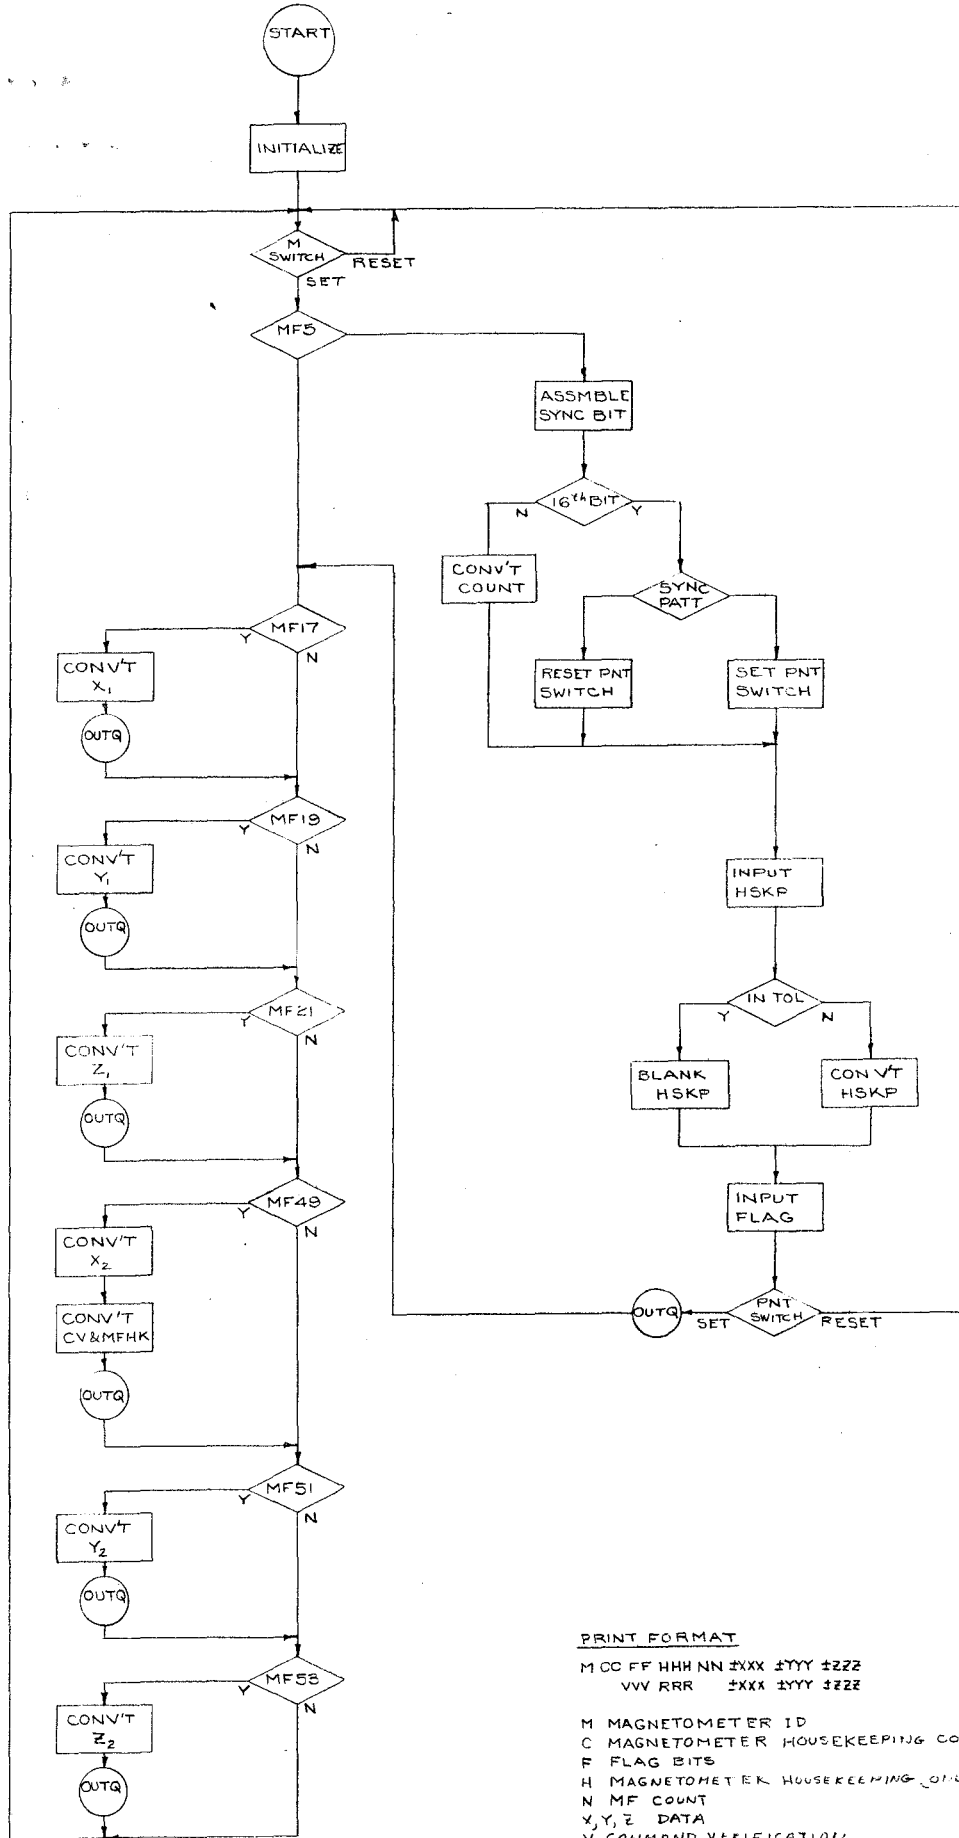

LSM

SUB-FRAME WORD NUMBER	ASSIGNMENT OF BITS						DATA IN OCTAL		PROCESSING				
	9	8	7	6	5	4	3	2		1	0	NOM	TOL
	SYNC	ENGINEERING DATA						STATUS FLAG BITS @					
1	1	TEMP #1						X <sub>1</sub> FLIP POSITION	X <sub>2</sub> FLIP POSITION				
2	0	TEMP #2						Y <sub>1</sub> FLIP POSITION	Y <sub>2</sub> FLIP POSITION				
3	0	TEMP #3						Z <sub>1</sub> FLIP POSITION	Z <sub>2</sub> FLIP POSITION				
4	0	TEMP #4						X GIMBAL POS.	Y GIMBAL POS.				
5	0	TEMP #5						Z GIMBAL POS.	THERMAL CONTROL				
6	0	LEVEL SENSOR #1						SPARE	SPARE				
7	0	LEVEL SENSOR #2						R <sub>1</sub> RANGE	R <sub>2</sub> RANGE				
8	0	SUPPLY VOLTAGE						BLANK	BLANK				
9	0	0						X <sub>1</sub> FIELD OFFSET	X <sub>2</sub> FIELD OFFSET				
10	0	0						Y <sub>1</sub> FIELD OFFSET	X <sub>3</sub> FIELD OFFSET				
11	0	0						Y <sub>2</sub> FIELD OFFSET	Y <sub>3</sub> FIELD OFFSET				
12	0	0						Z <sub>1</sub> FIELD OFFSET	Z <sub>2</sub> FIELD OFFSET				
13	0	0						Z <sub>3</sub> FIELD OFFSET	CAL. MOD. STATE				
14	0	0						OFFSET MATCH ADD.	OFF. T. MATCH ADD.				
15	0	0						FILT. STATUS	CAL. FWHB STATUS				
16	0	0						BLANK	BLANK				

NOTES

- ① ENGINEERING DATA REPEATS EVERY EIGHTH SUB-FRAME WORD
- ② SEE PAGE FOR FURTHER INFORMATION ON BEHAVIOR OF THESE BITS
- ③ ENGINEERING DATA IS PRINTED EVERY MAIN FRAME OCCURRENCE OF MF WORD #5 (WHEN OUT OF TOLERANCE)

PRINT FORMAT

M CC FF HHH NN ±XXX ±YYY ±ZZZ  
 VVV RRR ±XXX ±YYY ±ZZZ

- M MAGNETOMETER ID
- C MAGNETOMETER HOUSEKEEPING COUNT
